**Interview guidance proforma**

Explain to the participant that the purpose of the interview is to explore the influences affecting their management recommendations for a patient with a large or complex colorectal polyp. The topics are for guidance to prompt discussion only and there should be flexibility in discussing other topics of interest to the participant.

### Before the interview
- Confirm eligibility and consent of participant
- Notify of right to withdraw
- Confirm that participant is happy with recording of interview
- What factors do you assess and consider once a complex polyp has been found?
- Are there any logistical considerations that would affect your chosen treatment?
- Are there any other influences to mention?
  (e.g. colleagues, patient, evidence)

### Topics for discussion

### At the end of the interview
- Confirm the participant has study team contact details
- Ask if they have any questions
- Ask if they would like a copy of the study report when available
